9. Display the average salary of all employees.
10. Get the details of the top 3 highest paid employees

1.Show all employees who work in the IT department.

```
mysql> select * from employees where department = 'IT';
+--------+------------+------------+--------+--------------+----------+
| emp_id | name       | department | salary | joining_date | city     |
+--------+------------+------------+--------+--------------+----------+
|      2 | BobJohnson | IT         |  60000 | 2019-08-23   | Chicago  |
|      3 | Carol White | IT         |  75000 | 2021-01-10   | NewYork  |
|      7 | Grace Kim  | IT         |  80000 | 2017-09-18   | SanDiego |
|     10 | Jack Davis | IT         |  72000 | 2020-08-14   | Chicago  |
+--------+------------+------------+--------+--------------+----------+
```

2.Find employees whose salary is greater than 60,000.

```
mysql> select * from employees where salary > 60000;
+--------+------------+-----------+--------+-------------+----------+
| emp_id | name       | department | salary | joining_date | city     |
+--------+------------+-----------+--------+-------------+----------+
|      3 | Carol White | IT        |  75000 | 2021-01-10  | NewYork  |
|      6 | Frank Lee  | Finance   |  65000 | 2021-11-05  | NewYork  |
|      7 | Grace Kim  | IT        |  80000 | 2017-09-18  | SanDiego |
|     10 | Jack Davis | IT        |  72000 | 2020-08-14  | Chicago  |
+--------+------------+-----------+--------+-------------+----------+
```

3.Get all employees who joined after 1st Jan 2020.

```
mysql> select * from employees where joining_date > '2020-01-01';
+--------+------------+-----------+--------+-------------+----------+
| emp_id | name       | department | salary | joining_date | city     |
+--------+------------+-----------+--------+-------------+----------+
|      1 | Alice Smith | HR        |  45000 | 2020-02-15  | NewYork  |
|      3 | Carol White | IT        |  75000 | 2021-01-10  | NewYork  |
|      4 | David Brown | Finance   |  50000 | 2020-06-01  | SanDiego |
|      6 | Frank Lee  | Finance   |  65000 | 2021-11-05  | NewYork  |
|      9 | Irene Scott | Marketing |  53000 | 2021-03-22  | NewYork  |
|     10 | Jack Davis | IT        |  72000 | 2020-08-14  | Chicago  |
+--------+------------+-----------+--------+-------------+----------+
```

4.Find the total salary paid to employees in each department.

```
mysql> select department, sum(salary) as total_salary from employees group by department;
+-----------+-------------+
| department | total_salary |
+-----------+-------------+
| HR        |       92000 |
| IT        |      287000 |
| Finance   |      115000 |
| Marketing |      108000 |
+-----------+-------------+
```

5.Show the highest paid employee in the Finance department.

```
mysql> select * from employees where department = 'Finance' order by salary DESC limit 1;
+--------+----------+-----------+--------+-------------+---------+
| emp_id | name     | department | salary | joining_date | city    |
+--------+----------+-----------+--------+-------------+---------+
|      6 | Frank Lee | Finance   |  65000 | 2021-11-05  | NewYork |
+--------+----------+-----------+--------+-------------+---------+
```

6.List employees who are from Chicago and earn more than 55,000.

```
mysql> select * from employees where city = 'chicago' and salary > 55000;
+--------+-----------+------------+--------+--------------+---------+
| emp_id | name      | department | salary | joining_date | city    |
+--------+-----------+------------+--------+--------------+---------+
|      2 | BobJohnson | IT         |  60000 | 2019-08-23   | Chicago |
|     10 | Jack Davis | IT         |  72000 | 2020-08-14   | Chicago |
+--------+-----------+------------+--------+--------------+---------+
```

7.Find the number of employees in each city.

```
mysql> select city, count(*) as employee_count from employees group by city;
+----------+---------------+
| city     | employee_count |
+----------+---------------+
| NewYork  |             4 |
| Chicago  |             4 |
| SanDiego |             2 |
+----------+---------------+
```

8.Show employees in the IT department ordered by salary in descending order.

```
mysql> select * from employees where department = 'IT' order by salary DESC;
+--------+------------+------------+--------+-------------+----------+
| emp_id | name       | department | salary | joining_date | city     |
+--------+------------+------------+--------+-------------+----------+
|      7 | Grace Kim  | IT         |  80000 | 2017-09-18  | SanDiego |
|      3 | Carol White | IT         |  75000 | 2021-01-10  | NewYork  |
|     10 | Jack Davis | IT         |  72000 | 2020-08-14  | Chicago  |
|      2 | BobJohnson | IT         |  60000 | 2019-08-23  | Chicago  |
+--------+------------+------------+--------+-------------+----------+
```

9.Display the average salary of all employees.

```
mysql> select AVG(salary) as average_salary from employees;
+---------------+
| average_salary |
+---------------+
|     60200.0000 |
+---------------+
```

10.Get the details of the top 3 highest paid employees.

```
mysql> select * from employees order by salary DESC limit 3;
+--------+------------+------------+--------+-------------+----------+
| emp_id | name       | department | salary | joining_date | city     |
+--------+------------+------------+--------+-------------+----------+
|      7 | Grace Kim  | IT         |  80000 | 2017-09-18  | SanDiego |
|      3 | Carol White | IT         |  75000 | 2021-01-10  | NewYork  |
|     10 | Jack Davis | IT         |  72000 | 2020-08-14  | Chicago  |
+--------+------------+------------+--------+-------------+----------+
```
